

“I have a check-list I use on all of my project. My major discovery has been to listen and absorb from my combined experiences of client and occupants. The architect must be tuned to their client, calibrating the results and ensuring the best possible fit from briefing, concept to completion.”

Ruth Wilson

Director

Professional Experience

Major project delivery experience and tenacity complement Ruth's industry and award acknowledged design ability.

Ruth's 19 years of experience in Australasia and Europe across a wide range of commercial and institutional client groups is a significant advantage to clients embarking on a new project or simply wondering where to begin. Clients involved in projects large and small benefit from Ruth's experience in a variety of project delivery methods, including Design and Construct and Private Public Partnerships. Her extensive industry involvement includes membership of the Architectus design group, the RAI Large Practice Forum, and the Building Commission's Building Regulations Advisory Committee. She was winner of the 2003 National Association of Women in Construction Award for Design.

Ruth is known for her ability to manage large and complex projects, such as the Melbourne Airport Terminal Expansion, and co-ordinate multidisciplinary teams. Client relationships are an integral part of Ruth's role, and design communication is a major part of this.

Ruth has delivered many large scale projects including the Australian Synchrotron. She has designed significant projects, such as St Michael's

Grammar Junior School and the Qantas Flight Training Centre. Ruth has extensive experience in the design and construction of facilities housing highly technical equipment requiring stringent performance specifications.

Significant Projects

Melbourne Airport T2 Expansion

Staged expansion of the Melbourne International Terminal to provide upgraded baggage handling and passenger processing capability, a new retail precinct and 5 new international gates.
24 000m² | \$330m

Australian Synchrotron, Melbourne

116m diameter building to house Australia's first Synchrotron.
13 000m² | \$50m

Monash Victorian College of Pharmacy, Melbourne

A PPP Project, the new facility will serve to consolidate Monash University's presence on the "Parkville Strip", a world-renowned biomedical precinct.
9850m² | 6 storeys | \$50M

Monash Centre for Electron Microscopy, Melbourne

Laboratory building to house 9 electron microscopes, including the most powerful FEG TEM microscope in Australia.
1300m² | \$14m

St Michael's Grammar Allan Pizzey Building, St Kilda

The design of the classroom building was based on Reggio Emilia educational philosophy.
2600m² | 3 storeys | \$5.5m

Coles Myer Supply Chain Transformation

Design and documentation for 11 new distribution centres around Australia, which support Coles Myer's National Food and Liquor Supply Chain Network.
700 000m² | \$1 billion

Qantas Flight Training Centre, Melbourne

Extension and refurbishment of existing facilities to house 4 new flight simulators
2220m² | \$16m

Qualifications

Bachelor of Architecture (RMIT)

Registered Architect, Victoria and NSW
