Professional Experience

Damian is a registered architect since 1996 and has over 20 years of New Zealand and overseas experience. He has completed projects across a broad range of industry sectors, with a particular focus on education, public and commercial projects including work across primary, secondary and tertiary education sectors.

Damian's local experience includes individual building projects at numerous established schools, in addition to new build and greenfield school projects for both public and private sector organisations. He has been involved in master planning work for secondary and tertiary education organisations and has a particular interest in the architectural possibilities presented by refurbishment and seismic upgrade projects.

Damian has considerable experience in the briefing, client and user group liaison, consultant coordination and administration of complex projects. He offers a well developed understanding of sustainable design principles and of the opportunities that renewable energy strategies offer in the design of useful and enjoyable spaces.

In 2014 Damian was appointed to the NZ Registered Architects Board assessors panel.
