Professional Experience

Paulo brings local and international design experience and an extensive knowledge of contemporary design practices, precedents and exemplars. Paulo returned to Architectus as an Associate having previously worked for the practice from 2012 to 2014. Paulo has considerable experience in education, master planning and public projects.

Paulo's role incorporates client liaison and design from concept through design development phases. Combining rigorous analysis with sophisticated modelling and visualisation techniques, Paulo is able to clearly communicate design concepts to clients and stakeholders.

Paulo has participated in many national and international design competitions and, as a design educator, taught architectural design studios at RMIT University School of Architecture & Design and Monash University.
