Professional Experience

Greg has over 16 years of international experience in urban design, master planning and landscape architecture including master planning for high density mixed use residential and commercial urban renewal sites for Government clients and private developers.

With demonstrated expertise in high level project management, Greg has delivered many high quality urban design and master planning projects on time and on budget. He has strong experience in managing other specialist consultants to support urban design and planning projects, including landscape, engineering, traffic, environment, heritage and flooding, ensuring successful integration of disciplines to achieve optimal design outcomes for the client.

Greg has keen research interests in the form and functioning of cities including urban settlement patterns over time, movement networks and the capacity for cities to sustain transformation.

Significant Projects

Central Workshops, Waterloo
Urban design and planning options demonstrating potential future development on a 2 ha site owned by Sydney Water located within the Green Square Urban Renewal Area and bordering the Lachlan Precinct.

St Leonards Development Capacity Study
Urban design and development capacity analysis for residential and commercial development. Analysis of recent constructed and approved development, identification of available development sites, capacity under existing development controls, and modelling of future development scenarios with revised FSR and height of building controls.

Liverpool City Centre Revitalisation
Urban design strategies for the River Connections and City Gateways projects for Liverpool City Council in collaboration with the Government Architect's Office (GAO). This was a high level strategic project, setting a future vision and guidelines for repositioning Liverpool City Centre as a Regional City and will be implemented over the next 10-15 years.

Eastlakes Master Plan and Rezoning, Sydney.
Urban design study and options as part of a state government divestment project to rezone a strategically important site to mix use/high density residential development.

Station Plaza and Transport Interchange, Bankstown (Clouston).
Community consultation, review and concept design of key public domain elements for a new bus and rail plaza interchange and commercial centre including an urban landscape improvement to facilitate the new north-south bus corridor, better pedestrian accessibility and a new identity for the centre. *Awards: Cement Concrete Australia Award, 2010; The Local Government Award, 2010; Institute of Public Works Award, 2010.*

Urban Renewal projects for Bankstown CBD, Bankstown (Bankstown City Council).
Design of several key public domain urban renewal projects in Bankstown CBD. Including: Bankstown Arts Centre redevelopment, streetscape revitalisation, new public open space, pedestrian accessibility and legibility, and traffic improvements.
